EXPERIENCE

Flamong LLC — Backend developer

June 2023 – Till Date (Remote)

- Crafting efficient server-side solutions, utilizing Java, Kotlin and related technologies. My focus on scalability and code quality ensures the robustness of our applications, contributing to our team's success in delivering top-notch software solutions.

Probity Hub — Backend developer

September 2022 – April 2023 (Hybrid)

- I excel in designing Java-based server-side solutions, prioritizing scalability and code quality, which has led to an overall team productivity improvement of 20%. Additionally, my dedicated focus on delivering robust applications has resulted in a 15% increase in client satisfaction, contributing significantly to our team's success and the organization's continued growth.

Decagon, Lagos — Java Software Engineer

August 2021 – March 2022

- Maintained 100% client satisfaction through rigorous coding practices with MySQL and PostgreSQL. I am skilled in Spring Boot, Spring Security, JPA, Hibernate, and Java 8/11+. Achieved 100% efficiency in API development.

Trybal Technology, Ilorin — Java Trainee

March 2020 – June 2021 (On-site)

- Eager trainee with a focus on client satisfaction, adept in Spring frameworks. Actively contributing to projects, optimizing APIs, and refining databases. Committed to learning and achieving excellence in software development.

TECHNOLOGIES

- Java
- Spring Boot
- Spring Security
- Kotlin
- ktor
- Docker
- Git
- SQL(Postgres and MySQL)
- Postman
- Jira, Agile Methodology
- Testing (JUnit and Mockito)
- APIs and RESTful Services
- HTML 5
- CSS 3
- Javascript

PROJECTS

WalletWise

WalletWise, A dynamic financial web app, streamlines financial management. I spearheaded the development of its backbone. My responsibilities encompassed crafting essential boilerplate code, optimizing entity mapping, and seamlessly integrating API consumption. Notably, I oversaw transaction history functionalities, elevating the app's core features. Built on a robust microservices architecture and MySQL database, WalletWise ensures a secure and user-friendly financial management experience.

LogiTrack

LogiTrack, a logistics-focused application, I played a crucial role within a 15-member team. My primary responsibilities centered around user management and enhancing security aspects. This included creating and managing user accounts, login mechanisms, as well as configuring roles for delivery personnel and administrators. My contributions were vital in ensuring seamless operations and data protection within the application.

GoCash

GoCash, is a financial web app that simplifies financial management, I played a pivotal role in developing the backbone of the application within a team of 18 members. My contributions involved creating boilerplate code, efficient entity mapping, and integrating API consumption. Additionally, I managed transaction history functionalities, enhancing the core features of the app, which is now known for its secure and user-friendly financial management experience.

CoutureConnect-API

A dynamic fashion blog, captivating readers with the latest trends, styling tips, and industry insights. Discover diverse content ranging from outfit inspirations to runway highlights, curated to empower fashion enthusiasts and keep them at the forefront of style evolution.

EDUCATION

Ladoke Akintola University Of Technology (B.Sc)

*Bachelor of Computer
Science.*

Grade: *Second Class
Upper*

Decagon Software Institute (Backend Developer) Software Engineer.

Federal Polytechnic Offa (HND)

*Higher National Diploma
in Computer Science.*

Grade: *Lower Credit*

CERTIFICATION

Scrum Fundamentals certificate

EF Standard English Test
(EF SET)

Spring and Spring boot
